

“It Takes More Than Seed.”

Guaranteed Stand Establishment.

There are six proven steps to successful stand establishment. Let Jason Tronbak, Conservation Specialist, guide you.

Custom Mixing.

Every project is unique. And that is exactly why Millborn Seeds takes pride in having a veteran Mixologist - Craig Olson. With nearly two decades of expertise, Craig offers precise custom seed mixing and packaging solutions.

Superior Service.

We value long-term relationships and the vibrance of your field. That's why we analyze aerial photos and soil maps to determine the proper species and varieties. We also offer seed plan writing, custom seed mixing, next day delivery, perfect paperwork, seed drilling advice, and walking fields.

Expertise Since 1987.

Based in Brookings, South Dakota, Millborn Seeds consists of an expanding team of Grass Seed Specialists. In the Conservation and Wildlife division, Jason Tronbak takes the time to understand the needs of your land.
