

MILLBORN'S

Longtail Delight

Longtail Delight serves as a multi-functional food source, providing nutrition and protection for upland game birds throughout the long fall and winter months.

Ingredients: White Grain Sorghum (Milo)

Why is Longtail Delight a great choice for food plots?

- Easy to establish
- Excellent source of food and thermal cover during the fall and winter seasons
- Ranges 3.5' – 4' in height
- Short stature encourages hunter's safety, effective dog handling and ease of swinging on flushed birds
- 70 – 80 day maturity

To establish a successful food plot:

- Seeding Dates: mid-May through late June
- Seeding Rates: 10 lbs/acre (drilled) or 15 lbs/acre (broadcast) at 1/2" to 1" deep
- Herbicide Use*: Preplant – Glyphosate
Postplant – Atrazine, Buctril®, Clarity® or 2,4-D

Millborn's Longtail Delight is available in 50# bags.

*Refer to herbicide labels before use.
