

MILLBORN'S

# Pheasant Pheast

Pheasant Pheast contains a specific blend of sorghum and millet, which provides an excellent late-season food source for your upland game bird population.

**Ingredients:** Red Grain Sorghum (Milo) and White Proso Millet

Why is Pheasant Pheast a great choice for food plots?

- Easy to establish
- Great food and cover source during fall and winter
- Approximately 3'– 4' tall, providing ideal hunting cover
- 70 – 80 day maturity

To establish a successful food plot:

- Seeding Dates: mid-May through late June
- Seeding Rates: 10 lbs/acre (drilled) or 15 lbs/acre (broadcasted) at 1/2" to 1" deep
- Herbicide Use\*: Preemergence – Glyphosate  
Postemergence – Clarity® or 2,4-D

Millborn's Pheasant Pheast is available in 10# bags.

\*Refer to herbicide labels before use.
