

## SOLAR MIXES

# TECH SHEET

## GRUB HUB

Grub Hub is an extremely diverse mixture of native and introduced species that aligns with your goals of being low maintenance, short in stature, good for grazing, and a food source for pollinators. The introduced species can put your establishment worries at ease, as they will quickly emerge to provide green cover throughout the solar farm. The native grasses and wildflowers are long-lived and very hardy and will provide beautiful scenery for years to come.

### MIX RATIO

- 54% Solar Array Brand Fine Fescue (17.5 lbs/acre)
- 18% Forage Kentucky Bluegrass (5 lbs/acre)
- 9% Timothy (3 lbs/acre)
- 5% Crested Wheatgrass (1.5 lbs/acre)
- 5% Sideoats Grama (1.5 lbs/acre)
