SIERRA FLATS

- Year-long perennial browse and protein source for western game animals

Sierra Flats was designed to provide a year-long perennial browse and protein source for western game animals. Specifically designed for the correct environment, this blend of legumes and cool season grasses is a superb choice for any wildlife manager.

AGRONOMICS

Seeding Depth	1/2 inch
Seeding Rate	15 lbs/acre

*Sierra Flats offers a perennial food plot option so planning and location are key. Pre-dominate winds, topography and past wildlife patterns should all weigh in on where you decide to establish your plot.
