## BLACK-EYED SUSAN

Black-Eyed Susan is an easy establishing forb. Bees, butterflies, song and game birds are attracted to Black-Eyed Susan for pollen collection and to feed on its seeds. It prefers acidic soils and is well-adapted to clay, loam, and sandy soils.

### AGRONOMICS

Light Requirements	Full, Partial
Bloom Period	June-September
Bloom Color	Yellow
Mature Height	4 feet
Soil Moisture	Medium to Dry
Seeding Rate	1-2 lbs/acre
Package	1 lb, 5 lb
Planting Instructions	Site preparation is vital for allowing your seed to make clean contact with the soil, allowing for successful and uniform germination. Start with a clean, firm, weed-free seedbed to allow for uniform seed placement and an increased chance for faster establishment.
