

SINGLE SPECIES

TECH SHEET

CANADA WILDRYE

Canada Wildrye is a versatile cool-season perennial that can be used in land restoration, erosion control, livestock forage, as well as wildlife food and habitat cover. Growing to 2.5' to 5' tall, it grows well in sandy and rocky soils even in predominantly shaded areas. Canada Wildrye can be found around shaded stream banks or fence rows and in open forests.

AGRONOMICS

| | |
|-----------------------|--|
| Variety | Mandan |
| Mature Height | 3-6 feet |
| Soil Moisture | Wet to Dry |
| Seeding Rate | 10 lbs/acre |
| Package | 1 lb bag, 10 lb bag, 50 lb bag |
| Planting Instructions | Site preparation is vital for allowing your seed to make clean contact with the soil, allowing for successful and uniform germination. Start with a clean, firm, weed-free seedbed to allow for uniform seed placement and an increased chance for faster establishment. |
