# TECH SHEET

## CICER MILKVETCH

Cicer Milkvetch is a long lived perennial legume. It is most known for its non-bloat characteristics for grazing livestock. With good nutritional values, it is a great option to put with grasses for both grazing livestock or making hay. It is a very vigorous plant that will hold soil well in areas with high erosion risk.

### AGRONOMICS

|                       |                       |
|-----------------------|-----------------------|
|                       | Cool Season Perennial |
| Seed Count            | 145,000 seeds/lb      |
| Seeding Rate          | 25 lbs/acre           |
| Seeding Depth         | 1/2 inch              |
| Days to First Grazing | 100 days              |
| Vegetative Height     | 24-30 inches          |
| Bloom Color           | White                 |
| Package               | 50 lb bag             |
