CRIMSON CLOVER

Crimson Clover is an annual clover that is very popular as a cover crop and wildlife attractant. It performs well in all well-drained soils and is cold tolerant until winterkill temperatures are reached in northern growing zones. Crimson Clover grows very quickly, fixes atmospheric nitrogen, and produces excellent quality forage in grazing mixes.

AGRONOMICS

Seeding Rate	15-20 lbs/acre
Height	1-3 feet
Package	50 lb bag, Coated & Inoculated, Raw
