

SINGLE SPECIES

# TECH SHEET

## EGYPTIAN WHEAT

Egyptian Wheat is a warm season grass known for its ability to reach incredible heights. It is most known to be used as a screen for wildlife habitat. With good ability to stand when seeded correctly, this should give cover late into the fall and even early winter.

### AGRONOMICS

	Warm Season Annual
Seed Count	20,000 seeds/lb
Seeding Rate	15-20 lbs/acre
Seeding Depth	1 inch
Planting Time	Late May-Early July
Days to Maturity	110 days
Vegetative Height	10+ feet
Package	50 lb bag
