FABA BEANS

Faba Beans are most known for their ability to be a vegetable or canning crop. They are a legume bean that like to be planted under cooler conditions, unlike most beans. They are commonly used in cover crops and food plots for their prolific nitrogen fixing abilities.

AGRONOMICS

	Cool Season Annual
Seed Count	2,500 seeds/lb
Seeding Rate	60 lbs/acre
Seeding Depth	3/4 inch
Planting Time	April-May/August
Days to Maturity	85 days
Vegetative Height	24-30 inches
Package	50 lb bag
