FORAGE SOYBEANS (CONVENTIONAL)

Conventional Forage Soybeans are commonly used for both forage production and food plots. This very late maturing soybean will stay green late into the fall in the north, which provides an excellent chopping option or a great place to hang tree stand over.

AGRONOMICS

	Warm Season Annual
Seed Count	3,000 seeds/lb
Seeding Rate	50 lbs/acre
Seeding Depth	1 1/2 inches
Planting Time	May-June
Maturity Pattern	Very Late
Vegetative Height	Up to 4 feet
Package	50 lb bag
