HUNTER BRASSICA

Hunter Brassica is a hybrid turnip. It is most known for its robust leaf structure and volume of biomass it is able to produce. This fast maturing variety is a great species to use in a rotational grazing crop or even in food plots to help attract deer and other ruminant species. They are an extremely high protein and easily digestible plant.

AGRONOMICS

	Cool Season Annual
Seed Count	220,000 seeds/lb
Seeding Rate	4 lbs/acre
Seeding Depth	1/4 inch
Planting Time	April-September
Days to First Grazing	40-60 days
Vegetative Height	Up to 24 inches
Package	55 lb bag
