NON-DORMANT ALFALFA

This Non-Dormant Alfalfa is positioned to be a southern by alfalfa. When winters don't get long last cold stretches there is no need for winter survival importance, but capturing the duration of the growing season is the goal in mind. This alfalfa will capture as many growing degree days as possible without shutting down for winter. Under irrigation, this Non-Dormant Alfalfa will maximize yield while still maintaining great quality.

AGRONOMICS

	Cool Season Perennial
Seed Count	Roughly 135,000 seeds/lb
Seeding Rate	20 lbs/acre
Seeding Depth	1/4 inch
Planting Time	February-April
Fall Dormancy	9
Winter Survival	N/A
Vegetative Height	Up to 30 inches
Package	50 lb bag
