VERNAL ALFALFA

Vernal alfalfa is one of the original lines of alfalfa genetics that has been around for many years. It is very drought and winter hardy. Vernal is best used for hay production on dryland or in alfalfa/grass mixtures to be hayed or grazed.

AGRONOMICS

Planting Time	Early Spring or Late Summer/Early Fall
Seeding Rate	Good Soil, Adequate Moisture: 15-20 lbs/acre Light Soil, Dry Conditions: 12-15 lbs/acre
Seeding Depth	1/2 inch
Package	50 lb bag, 50 lb bag Pre-Inoculated, 2,000 lb tote
