WHITE WONDER MILLET

White Wonder Millet is a foxtail-type millet primarily grown for hay. White Wonder millet will grow rapidly in warm weather and is adapted to a variety of soil types. This species is fast-growing, producing high forage yields, and can be harvested as quickly as 60-70 days after planting. White Wonder millet is a popular option in areas prone to hot, dry summers.

AGRONOMICS

Planting Time	Late Spring-Mid Summer
Drilled Seeding Rate	20-25 lbs/acre
Seeding Depth	1/2-3/4 inch
Package	50 lb bag
