TECH SHEET

WILD BERGAMOT

Wild Bergamot is a fragrant perennial used for flower arrangements and pollinator attraction. This flower grows well in nurseries and several neutral soil types. Wild Bergamot can grow to be 20" to 4' tall with distinct gray to green leaves and pink to lavender-colored petals.

AGRONOMICS

Light Requirements	Full, Partial
Bloom Period	July-September
Bloom Color	Purple
Mature Height	4 feet
Soil Moisture	Medium to Dry
Seeding Rate	1-2 lbs/acre
Package	1 lb, 5 lb
Planting Instructions	Site preparation is vital for allowing your seed to make clean contact with the soil, allowing for successful and uniform germination. Start with a clean, firm, weed-free seedbed to allow for uniform seed placement and an increased chance for faster establishment.
