WINFRED BRASSICA

Winfred Brassica is a hybrid brassica crossed between a kale and turnip. It is most known for its robust leaf structure and volume of biomass it is able to produce. It is a great species to use in a rotational grazing crop or even in food plots to help attract deer and other ruminant species. They is a an extremely high protein and easily digestible plant.

AGRONOMICS

	Cool Season Annual
Seed Count	175,000 seeds/lb
Seeding Rate	4 lbs/acre
Seeding Depth	1/4 inch
Planting Time	April-September
Days to First Grazing	60-90 days
Vegetative Height	Up to 24 inches
Package	55 lb bag
